 - 7-digit dialing to Mayport and Kings Bay
 - 10-digit dialing for OCONUS DSN
 - 10-digit dialing for FTS long distance
 - Use of standard trunk access codes:
 - 99 for commercial PSTN access
 - 98 for FTS access
 - 94 for DSN access

Dialing Plan Examples

- On-Base NAS Jacksonville:
 - Users may dial 7-digit PSTN or DSN prefix for the same base XXXX number on NAS Jacksonville and call will be completed
 - Examples:
 - User will dial 542-1234 (PSTN) or 942-1234 (DSN) for on post call
 - User will dial 790-1234 (PSTN) or 690-1234 (DSN) for FRCSE on post when new prefixes are in service
 - Users will continue to dial current 542 and/or 942 extensions until new prefixes are in service
- Local PSTN: 99 + PSTN number
 - Users will dial 99 for trunk access code followed by PSTN number
 - Example:
 - 99-644-1234
- Long Distance FTS: 98 + 1 + PSTN number
 - Users will dial 98 for the trunk access code followed by 1, followed by the long distance telephone number
 - Example:
 - 98-1-781-123-1234

Dialing Plan Examples (Cont.)
